SKILLS

Languages and Frameworks	JavaScript, TypeScript, Dart, LUA, Flutter, React, Express
Tools	Git, AWS, Google Cloud Platform
Soft Skills	Teamwork, Communication, Problem Solving

PROJECTS

ArenaMarker 2021 - Present

Technologies: Lua

Description: Developed a fully customizable community addon/plugin for an online game that easily automates tedious UI tasks.

- 41k+ downloads.
- Rank 14 in popularity among other addons in its respective category.
- Gathered customer requirements & prioritized user stories.
- Internationalization inclusion.
- Ongoing feature implementation.

Roaming Vendors 2022 - Present

Technologies: Express, Node, RESTful API, MongoDB, Heroku, AWS S3, Dart, Flutter, Google Cloud Platform

Description: Developed and deployed this project, with a colleague, to connect users and mobile vendors (i.e. food trucks) who are constantly going from location to location.

- Lead Scrum development life cycles from initial development to the external beta release.
- Implemented the back-end REST API in Express/Node.js, deployed to Heroku.
- Implemented security using authentication with JWTs, input validation and sanitation, password hashing, rate limiting, and other best practices.
- Developed the front-end, cross-platform mobile application in Dart using Flutter for Android and iOS.
